

Dust to Dust

Swirling, swirling cosmic dust
slowing down to form accretions
Melee-d bombasts
bringing elements
Combinations start to form

Water, basic simple cells
Environment effects affect
Time continues
adds complexity
Animals and plants emerge

Aeons pass with adaptations
The dominance of human life
Seeing, learning
making advancements
Never has it been so good

Yet more time, now faults develop
Man's creations reach their climax
Knowledge, progress
abnormalities
Stability no longer

With age the body fails, dies
as does our mother home the earth
Decline, decay
disintegration
Back to elements return

Swirling, swirling cosmic dust
